

Sakaki Town opens an official Twitter account!

Sakaki Town started to operate "Wireless Simultaneous Broadcast System for Disaster Prevention Administration." It transmits disaster prevention information and administrative news from Sakaki town, etc.

In addition, Sakaki town started "Sakaki-Town Twitter" and "Sakaki-Town Disaster Prevention Website." You can have a choice of suitable methods for acquisition of information.

Those who are not good at Japanese or want to obtain information by using smartphone, please start using Twitter and follow the Sakaki Town official account.

STEP 1

Download Twitter application and get your account

STEP 2

Search above user name by keyword search

STEP 3

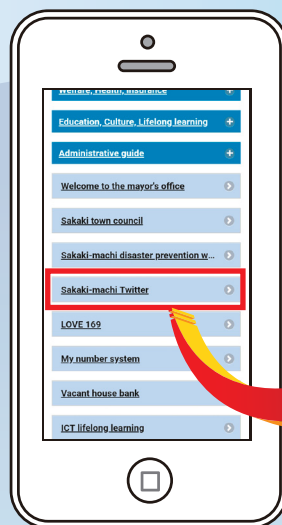

Follow the official Sakaki Town Twitter account

Delivery information

- * Emergency information from J-ALERT
- * Disaster information and disaster prevention information such as information of evacuation sites
- * Information from town administration and event information

What is J-ALERT

J-ALERT (the National early warning system) is a system that transmits high-priority emergency information from the National Government to the public by using the satellite when high-priority emergency situation occurs such as earthquake or armed attacks from other countries.
